Printed in China

What are included in this product?

One unit smart book light, a product quick guidance manual and a USB charging lead.

How to use this product?

Just open it gently as a normal book and it will light up instantly with a very cozy and smart warm LED light. Close up the 'book' and the light will automatically turn off.

Can it be opened at any degree ?

Yes,it can be opened at any degree up to 360 degrees and both covers are magnetic in the middle, so the two covers can be attached together while it's opened in 360 degrees.

How to charge this product?

Just connect the USB lead to your USB phone charge or any USB charge as long as the output is not more than 5V,and then connect the other micro end to the charging point at the left bottom side of the booklight while it's opened .while in charging,the charging indication light will be in orange and when it's fully charged,it will turn into green.

Is the paper waterproof ?

Yes,it's waterproof but we don't recommend you to get any water on the electrical parts under/inside the paper.

Is there any special care instruction to this product ?

No, there isn't any special care needed to this product apart from making sure you will charge the product via the right charger.you can charge it via your computer USB ports or any USB phone charger.

Please note: a heavy drop may seriously damage the wood spins of the 'book' if you have the wood version though. Please also open it gently with care and do not pull the spin of the 'book'.

What's the warranty of this product?

It comes with one year standard manufacturer warranty as long as it's a standard product fault and not being damaged by any intentional or accident force like a heavy drop or ripped papers etc.
